Legal basis and purposes of data processing

The legal basis for data processing is Art. 6 subsection 1(e) in conjunction with subsection 3 GDPR in conjunction with section 5 LHG in conjunction with the evaluation and quality management statutes for learning, teaching and further education of the University of Mannheim from 10.12.2021 (Evaluations- und Qualitätsmanagementsatzung für Studium, Lehre und Weiterbildung, hereinafter: “evaluation statutes”).

The purpose of data processing is to carry out course evaluations of the graduates’ program at the University of Mannheim.

Which data are processed by the University of Mannheim in the context of course evaluations?

The university processes data related to the respective course that are visibly collected in the questionnaire. In addition, the university processes the data listed in section 5 subsection 7 of the evaluation statutes: last name, first name, academic degree and school affiliation of the instructor, course title, type of course, date of data collection and data collected in the questionnaire. The survey data are generated by scanning the paper questionnaires as image files by means of a special software, transmitting these to a protected server, processing the questionnaire numbers and the handwritten texts within the text boxes and evaluating the given answers. In case of an online survey, the university stores the name of the survey, the individual transaction number (TAN) or passcode, the e-mail address to which the TAN was sent, as well as the status of participation in form of a yes/no answer. Each given answer receives a time stamp which is stored with the raw data of the survey. The university does not store any IP addresses so that it is not possible to determine which IP address is connected to which set of data. The survey data do not contain any information about which TAN or passcode was used to fill out the questionnaire. In case the survey data are transmitted via e-mail, the completed questionnaire cannot be traced back to the TAN or passcode.

Recipients

The data collected in the survey are evaluated by means of an evaluation software. Sections 5 and 11 of the evaluation statutes apply accordingly. The University of Mannheim has entered into a support and maintenance contract as well as a contract on data processing complying with the requirements specified in Art. 28 GDPR with the company Evasys GmbH.

Access to evaluation results, publication and further use are determined in section 9 of the evaluation statutes. Recipients of the evaluation results for a specific course that cannot be traced back to individual participants of the survey are the instructors of the respective course and the Academic Directors of the Graduate School of Economic and Social Sciences GESS. Upon request, the evaluation results must also be provided to the President's Office if necessary, in order to fulfill its duties according to the LHG. The recipient of aggregated reports of the school/department, which do not make it possible to identify individual instructors and do not contain any answers given in the text boxes, is the dean for student affairs, who presents the results of the aggregated reports to other bodies (committee on student affairs and teaching, school council) and the dean's office. In the event of publication, evaluation results cannot be traced back to answers given by individual participants.

Storage and erasure of data

According to section 11 of the evaluation statutes, the entities responsible for evaluation can store the raw data obtained in the context of course evaluations for a period up to five years and the aggregated data related to individual questions on a course for a period up to ten years. The completed questionnaires must be deleted by the end of the semester following the evaluation.

Information according to Article 13 GDPR

Voluntary participation and your rights

You have the right to obtain information about your data stored by the University of Mannheim and the right to have false data rectified.

Furthermore, you have the right to erasure, the right to restriction of processing and the right to object processing.

In order to exercise your rights, please contact:

University of Mannheim
