Press Release

Students of the Master's Programs in Business Administration, Business Informatics and Economics at the University of Mannheim Benefit from Excellent Study Conditions

According to the current ranking of master's programs published by the Centre for Higher Education CHE, the master's programs in Business Administration and Business Informatics at the University of Mannheim rank among the top entries in all ten categories of the student survey. The master's program in Economics at the University of Mannheim is among the top entries in nine of ten categories of the student survey.

The University of Mannheim offers excellent study conditions in the master's programs in Business Administration, Business Informatics and Economics. This is shown by the current CHE University Ranking of master's programs.

To rank the universities, the CHE regularly conducts a survey among enrolled students. In the categories general study conditions, curriculum, support by teachers, support during studies, digital teaching elements, research orientation, practice-orientation in teaching, support for stays abroad and transition to master's programs, the students' evaluation of the Mannheim Master in Management is better or much better than the national average.

Students evaluate the University of Mannheim's master's program in Business Informatics and the Mannheim Master in Data Science above-average or significantly above the nationwide average in the categories general study situation, curriculum, support by teachers, support during studies, digital teaching elements, practice-orientation in teaching and support for stays abroad.

Compared to other programs in Germany, students have given the master's program in Economics better or much better evaluations than the nationwide average in the categories study organization, research orientation, and support for stays abroad.

The CHE ranking is the most extensive and detailed ranking of universities and universities of applied sciences in Germany. It is based on surveys among more than 120,000 students which the Centre for Higher Education regularly conducts at more than 300 higher education institutions in Germany, Austria, Switzerland and the Netherlands.
