Personal Details

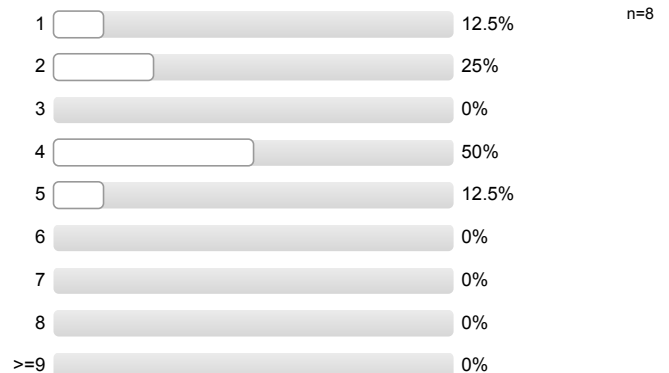

My program

My anticipated degree

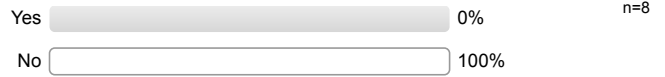

My semester

My gender

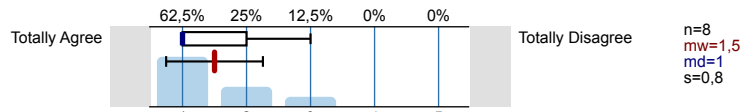

I am an international exchange student

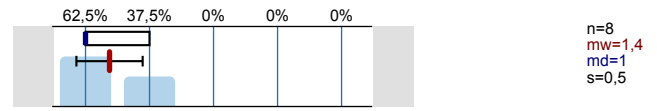

Information on online teaching

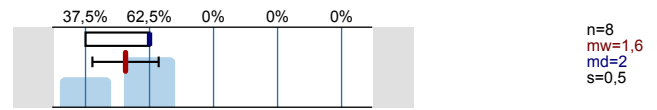

I found it very helpful to be able to set my own learning pace while using the online materials (e.g. learning videos)

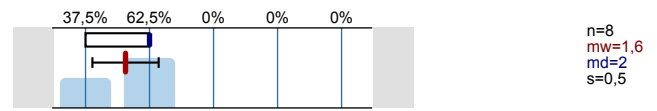

The online live classes (e.g. via Zoom) were very useful for understanding the course contents

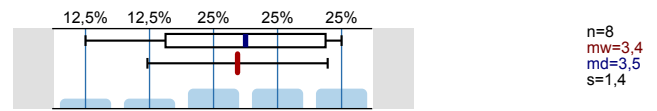

The online exercises and materials were very useful for understanding the course contents

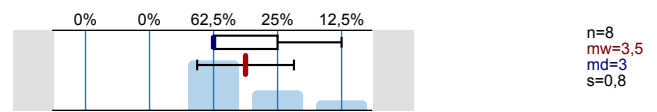

In my opinion, the online learning format could adequately replace classroom lessons

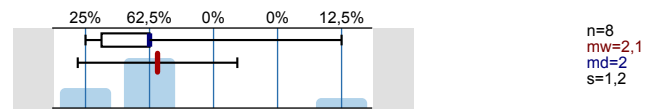

I wish I had received more direct help from the teacher while studying with the online learning environment

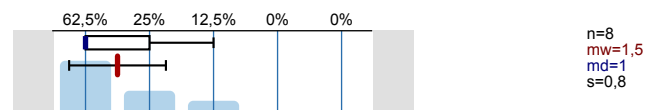

I wish there had been more contact with teachers while studying with the online learning environment

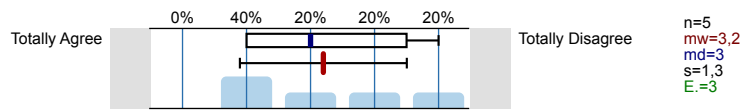

I really missed the personal contact with other course participants while studying with the online learning environment

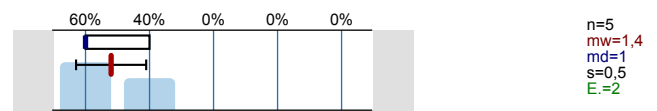

I have attended or watched (almost) all of the online lectures

Instead of previously recorded formats, it would be better to hold lectures as digital live events (e.g. via Zoom) so that questions can be asked

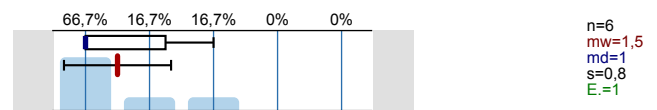

It was possible for me to work on worksheets with my submission partner during online teaching

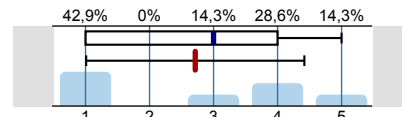

I suggested working on and submitting worksheets alone during online teaching

Es wird keine Auswertung angezeigt, da die Anzahl der Antworten zu gering ist.

The help given for working on the exercise sheets was sufficient

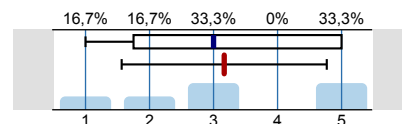

I watched the tutorials / exercises live or worked on them timely

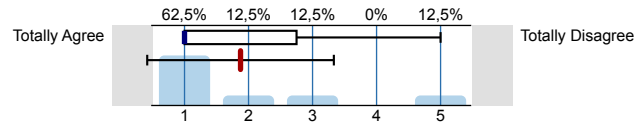

n=7
mw=2,7
md=3
s=1,7

I only did most of the exercises and tutorials shortly before the exam using the recordings

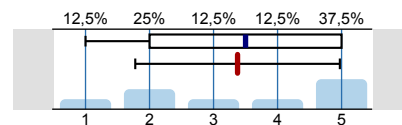

n=6
mw=3,2
md=3
s=1,6
E.=1

A revision course at the end of the semester is/would be useful

n=8
mw=1,9
md=1
s=1,5

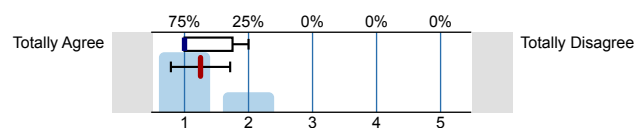

I would prefer to visit two to three shortened revision courses during the semester instead of one large revision course at the end of the semester

n=8
mw=3,4
md=3,5
s=1,6

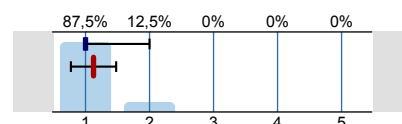

Course organization

The course was **well organized**

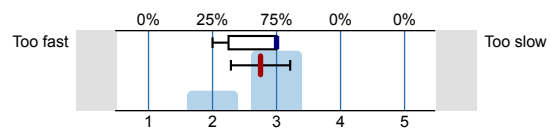

n=8
mw=1,3
md=1
s=0,5

Information on the **board/screen** was **clearly legible**

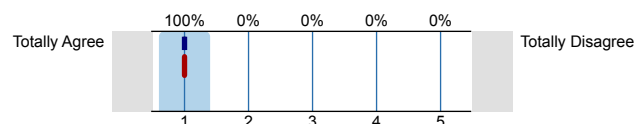

n=8
mw=1,1
md=1
s=0,4

The **pace** of the course was ...

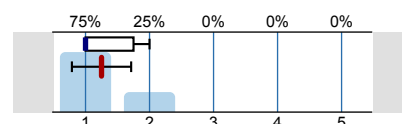

n=8
mw=2,8
md=3
s=0,5

The instructor's **articulation** was **clear**

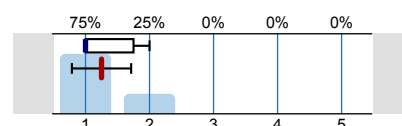

n=8
mw=1
md=1
s=0

The course content was illustrated with **examples**

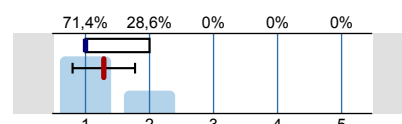

n=8
mw=1,3
md=1
s=0,5

The **instructor** was available for discussing **subject-related matters** with the students

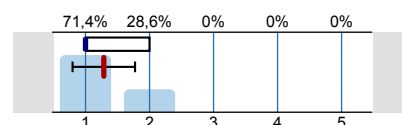

n=8
mw=1,3
md=1
s=0,5

The information on the board/screen **helped me understand** the course content better

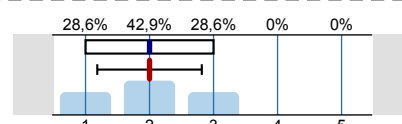

n=7
mw=1,3
md=1
s=0,5

Additional documents and downloads (i.e. copies, scripts, recordings) were **helpful** to understand the course content

n=7
mw=1,3
md=1
s=0,5

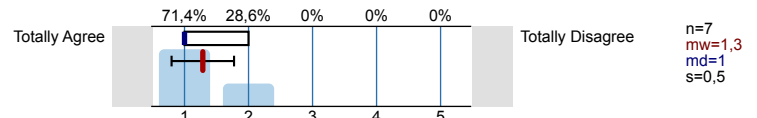

The use of **additional media** (except overhead/board) was helpful

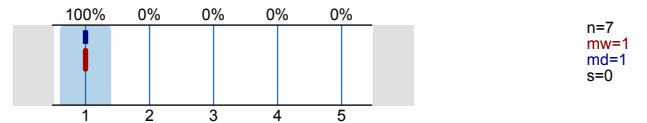

n=7
mw=2
md=2
s=0,8

Course content

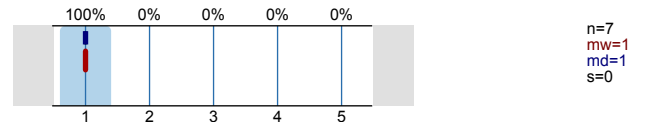

The instructor was **motivating**

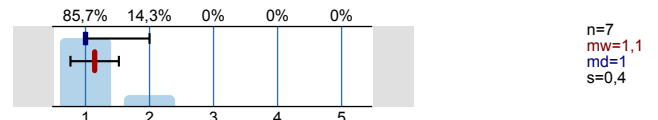

Overall, I am very **satisfied** with the instructor

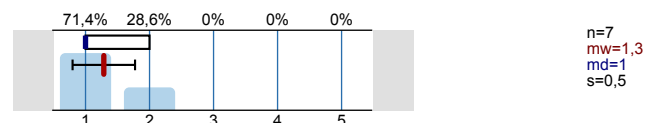

The instructor always seemed to be **well prepared**

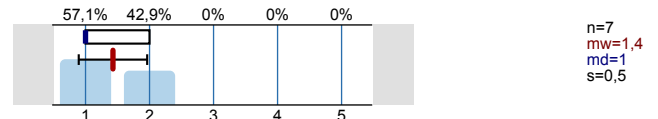

The instructor showed a strong **commitment** during the lecture.

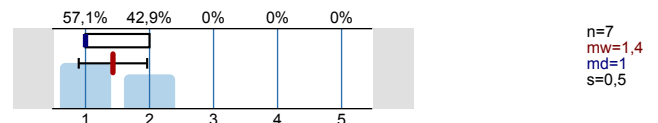

The instructor stood out with very high **teaching skills**

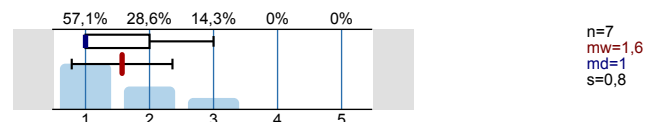

The instructor should receive an **award for excellent teaching**

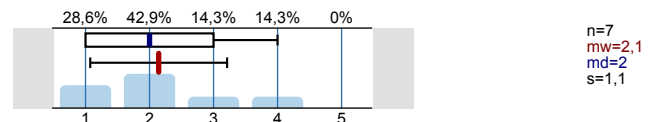

I have learned a lot during this course

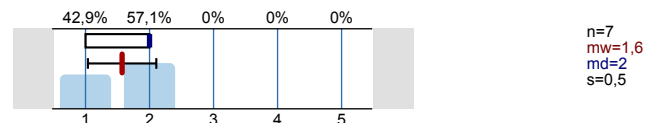

The course content is **well aligned** with other courses

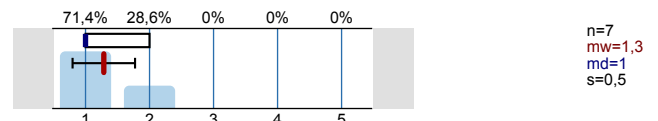

I feel that the course content is **important for my future professional career**

The lecture **fostered my interest** in the course content

Overall, I am very **satisfied** with the course

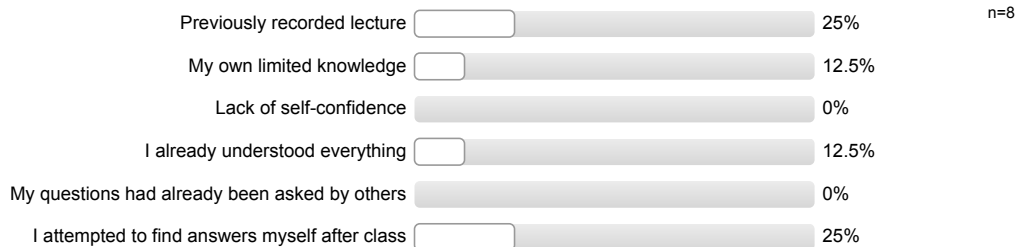

Evaluation of your own participation

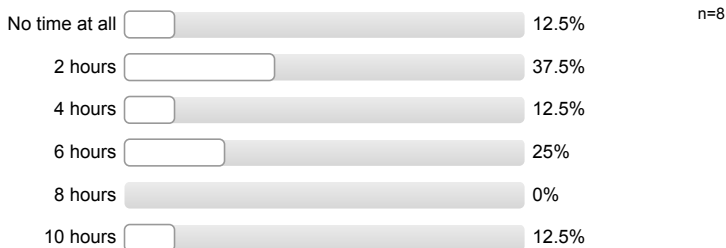

I asked questions during class

If not, why not? (Multiple answers are possible)

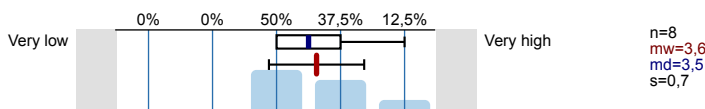

What was the average weekly amount of time you spent preparing for and reviewing the lecture contents (not including class time, time in the tutorial/ exercise group, or time devoted to completing worksheets)?

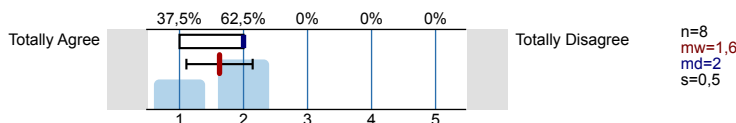

The average workload for the lecture in relation to the credited ECTS-points is....

_(One ECTS-point is equivalent to a students workload of approx. 30h.)

Overall evaluation of the course

My previous knowledge was sufficient for mastering the course content

Information on online teaching

Which aspects of online learning did you find positive/negative?

- I loved that the lectures were recorded!
 - I think it's very helpful that the lecture is being recorded.
- A negative point is that I didn't know anyone in the class and having an online class makes it even harder to get to know classmates and find team project members. I was lucky in the end and found good team members, but could have ended badly :)
- In general the lecture and exercise were very helpful. However, it was a bit annoying that the exercise was not recorded. I would have benefited from that.
 - The recorded videos were very helpful to rewatch specific parts I did not understand in the first place.
 - positive:
 - The option to decide for myself when I want to study
 - Being able to stop lecture videos to take notes
 - The option to repeat parts of the lecture videos if I did not understand them the first time
 - The additional time from not having to go to the university for the classes
 - negative:
 - nothing really

Your suggestions

What did you **like most about** the course?

- I liked that the lectures are recorded and I can view them anytime again
- I think it is good that the lecture was recorded and I liked the team project because I learned a lot. I also liked the exercises, because they helped me understanding the lecture content.
- The tutorial was very good. The breakout rooms helped a lot for solving the exercises. It also gave me a feeling of "University" because I interacted with random students and got to know other people.
- interesting project

What did you **not like** about the course?

- I think the project draft + presentation + final paper is a lot of work to be ungraded. Because of this my motivation was not too high tbh
- Projekt and presentation was cool, but the report is not really necessary
- The team project was very time-consuming and not graded. We were working a lot on the project and maybe it would have been nice to get a grade. Motivation shrank in the end because it was not graded.
- no exercise recording

What are your **suggestions** for improvement?

- Cut the final report or even better grade the project and make it like 20%/40% of the exam
- It would have been nice to get more detailed feedback on the projects. We put a lot of time and energy in it and I feel not entirely happy that the grade only relies on the final exam even though the project had to be done anyway. One could think about grading the projects and maybe just keep the ratio of this grade counting into the final grade very low.
- Maybe grading the project.
- don't expect an additional report of the project.
