Joint ZEW and MISES Seminar

It is our pleasure to invite you to our upcoming seminar titled:

“Financing the energy transition – the role of macro dynamics, policy, and financing types and conditions”

The seminar will be given by Dr. Tobias Schmidt, Assistant Professor of Energy Politics and the head of Energy Politics Group at ETH Zürich.

**October 16, 2020 at 13:00h at
Room Brüssel, ZEW, L7, 1, 68161 Mannheim**

Abstract:

Avoiding dangerous levels of climate change, requires a fast and deep decarbonization of the energy sector by means of a socio-technical transition. While thousands of studies on the energy transition and specific aspects of it exist, the financing dimension remains surprisingly under-researched. In this talk, Tobias Schmidt will present a summary of recent and ongoing research on the financial dimension of the energy transition. Topics that will be covered, include the role of public policy and particularly "green" public banks, the potential effect of macro dynamics, and the importance of experience in renewable energy finance.

We look forward to welcoming you at this event!

Stefan Reichelstein, Ph.D.

Professor of Business Administration
Director, Mannheim Institute for Sustainable Energy Studies (MISES)
