

Substantive SMiP Research Topics in Tübingen

Instructors: Mandy Hütter and Rolf Ulrich

In this workshop, we present selected papers on substantive research conducted at the labs of Mandy Hütter and Rolf Ulrich. These concern issues of experimental, cognitive, and social-cognitive psychology. Researchers will present exemplary experimental and theoretical studies that are conducted in the two labs, focusing on perceptual and cognitive decisions, evaluative conditioning and sampling accounts of evaluative judgments as well as mathematical models of these phenomena.
