Title: Training: Conference Presentations

Instructor(s): Andrea Kiesel

Abstract:

This course is a hands-on training on conference presentations – talks and posters. We start by collecting, sorting and discussing features of very good and rather moderate talks. Then participants will show an own presentation (or parts thereof) and we elaborate on improvement strategies suitable for the individual presenter. Then we discuss specific features of poster presentations and elaborate on ways to improve individual posters and their presentation.

Assignment: Please bring an own presentation (if possible a short conference presentation) and a poster on your topic.

Credit(s): 1 workshop day
