Title: Workshop: Browser-based Experimentation with lab.js

Instructor: David Izydorczyk

Abstract:

This workshop focusses on building studies with the lab.js online experimental software. This workshop will provide an introduction into the lab.js online experimental software, as well as basics in HTML and JavaScript, to enable participants to build common psychological experiments. In the first part of the workshop, we will focus on the graphical user interface and in-built lab.js functionalities. In the later parts of the workshop, we will then learn how to add custom logic and functionalities with JavaScript. We will also discuss different ways to deploy lab.js experiments online.

Assignment: TBA

Credits: 2 workshop days
