Title: Training: Research Organization and Useful Software

Instructor: Martin Schnuerch

Abstract:

This training aims to equip participants with basic skills and useful tools for a successful PhD journey. It will provide guidance for developing a research plan and a schedule for the dissertation project as well as for writing the dissertation proposal. There will also be an overview of helpful software tools and packages (e.g., statistical software for data analysis and statistical computing, programming software, online repositories, writing software, literature data bases…). Finally, we will discuss strategies for self-management and maintaining a healthy work-life-balance.

Assignment: none
