

Title: Coaching Seminar: Writing a Research Proposal

Instructor: Andrea Kiesel

Abstract:

This workshop is a hands-on training on how to write a research proposal – with a specific focus on DFG proposals (Emmy Noether as well as “Eigene Stelle”). I start with an overview on where to get information regarding different funding options. Then we will have a detailed look on the funding options of the DFG and the respective forms. Here I will also inform about the reviewing process and give hints on important parts of the proposal. Then a Q& A on your own research proposals follows. In case that you already have an idea for your own research proposal or already have started drafting a proposal, we can discuss the main parts of the proposal hands-on.
