

Forschungskolloquium

FSS 2024

Fr. 13:45 – 15:15

L13, R 519

Termine	Name	Thema
23.02.2024	Thorsten Meiser Emre Alagöz	Introduction & Organization Jamais ou: Disentangling differences in cognitive response mechanisms via mixture IRTree models
08.03.2024	Timo Seitz	‘How would you fake?’: Disentangling qualitatively different faking tendencies through mixture IRT modeling
15.03.2024	All	Anderson, S. F. (2023). Multiplicity in multiple regression: Defining the issue, evaluating solutions, and integrating perspectives. <i>Psychological Methods</i> , 28(6), 1223-1241. DOI: 10.1037/met0000457
12.04.2024	David Grüning (GESIS) All	Cumulative redundancy bias: Introduction, explanation, and cue utilization Grüning, D. J., Alves, H., Mata, A., & Fiedler, K. (2023). Reversing the cumulative redundancy bias to demonstrate metacognitive flexibility in cue utilization. <i>Journal of Experimental Social Psychology</i> , 107, 1-18. DOI: 10.1016/j.jesp.2023.104471
26.04.2024	Jan Rütten	The impact of data cleaning decisions on central coefficients: A specification curve analysis focusing on the detection of careless responding
03.05.2024	Benedikt Karran Ilse Ihlenfeld	Detecting multidimensionality in latent space What the team does to us: Daily relationship between psychological safety, authenticity and well-being
31.05.2024	Lousie Saint Macary	Orientation in new environments with virtual reality: Creating cognitive maps
