

Forschungskolloquium

HWS 2022

Fr. 13:45 – 15:15

A5,6 Seminar Room C 217

Termine	Name	Thema
23.09.2022 Zoom (see below)	Thorsten Meiser Esther Ulitzsch (IPN Kiel)	Organization Response time-based approaches for identifying and accounting for careless and insufficient effort responding in survey data
07.10.2022	Anne Voormann (Universität Freiburg)	Domain-general as well as task-specific influences of cognitive control: A reanalysis using the diffusion model for conflict tasks
14.10.2022 15:00-16:30 Room: A5, C217	Paul de Boeck (Ohio State University)	The heterogeneous and multilevel nature of variance-covariance: Issues and opportunities
28.10.2022	Maximilian Bee Marcel Schreiner et al.	Evaluating predictive information criteria to identify finite mixtures in ordinal data Belief updating based on ambiguous scientific evidence
18.11.2022	Nina Embs Alicia Gernand	An investigation of measurement invariance in the English and German Big 5 Inventory 2 Erroneous trait responding in intensive longitudinal data – A latent state-trait modeling approach
02.12.2022	Simon Stuber (Universität K-Landau)	Decomposing interdependent affect dynamics with the multilevel autoregressive model with random residual variances
