

## **Job Offer:**

### **Doctoral Student / Staff Researcher (m/f/d)** at the Mannheim Institute for Sustainable Energy Studies (MISES)

The Mannheim Institute for Sustainable Energy Studies (MISES) features a highly motivated team in research with a diverse, international, and interdisciplinary background. Our work is published regularly in premier academic journals in the fields of business, management, economics and science. We maintain a close network of renowned researchers and leading companies around the world within the domain of sustainability management.

Members of the MISES team:

- Have an active interest in sustainable energy with an economic- and business perspective.
- Have a quantitative background and apply quantitative analytical tools with academic rigor.
- Consistently show high commitment, intrinsic motivation, and performance.
- Master the software programs relevant to their work (e.g., Excel, R, Python, LaTeX).
- Communicate with ease in English, both in writing and in speaking.
- Enjoy working on a flexible time schedule, both in a team and on their own.
- Contribute to projects at MISES related to research and teaching beyond their individual studies.

Applications are reviewed on a rolling basis. They should include a statement of motivation, curriculum vitae, and supporting transcripts. We welcome all applications, irrespective of gender or personal background. Please do not hesitate to contact our team members in case of any questions.

In addition to the items listed above, you are expected to:

- Have completed a Master's degree in business or economics, or find yourself close to completion.
- Contribute to the teaching curriculum at MISES.

We encourage our research staff members to pursue their doctorate and support them accordingly. Next to the traditional doctorate that is conducted only at a chair or institute, the University of Mannheim also offers doctoral studies through a structured doctoral program at the Graduate School of Economics & Social Sciences (GESS). A key advantage of this program is the extensive course portfolio that facilitates the acquisition of strong methodological and technical foundations for doctoral students. Detailed information about the program can be found on the GESS website: [www.gess.uni-mannheim.de](http://www.gess.uni-mannheim.de).

Please note that if you are interested in pursuing the doctoral program at the GESS, you must apply not only to MISES but also to the GESS within the application deadlines of the program. The application deadline for a start within Center for Doctoral Studies in Business (CDSB) in September 2021 is on **31.03.2021**. Please also note that the faculty members at MISES are affiliated with the area of

Accounting. An application to the accounting track at CDSB is thus the best way to indicate your interest in pursuing a doctorate at MISES. Yet, MISES is also open for applications from other tracks and disciplines.

Applications should be submitted to:  
University of Mannheim  
Mannheim Institute for Sustainable Energy Studies  
Prof. Stefan Reichelstein, Ph.D.  
Schloss, Ost  
68131 Mannheim

or via e-mail to: [esavchen@mail.uni-mannheim.de](mailto:esavchen@mail.uni-mannheim.de)

Data protection: Please note that data transmitted via unencrypted email communication may be subject to unauthorized access by third parties and confidentiality cannot be guaranteed. Information regarding the collection and processing of personal data according to article 13 of the GDPR is provided on the website of the University of Mannheim under "Employment Opportunities" (<https://www.uni-mannheim.de/en/about/employment-opportunities/data-protection-during-the-job-application-process/#c93617>). Submitted documents will only be returned if the application includes an envelope with sufficient postage. Otherwise, the documents will be destroyed in accordance with the data protection law after the application process is completed. Electronic applications will be deleted accordingly.
